Discover the coastal inspired fragrances

In the heart of Paris, Cecile Zarokian, an independent perfumer, works her magic through scent. Trained by the best, she crafted her first masterpiece, Epic Woman for Amouage, before graduating from ISIPCA. Cecile collaborated with an illustrator, and created, an immersive exhibition that intertwined visual art and fragrance, captivating audiences across Europe. Beyond traditional perfumery, Cecile's expertise in scent branding and marketing transformed events into multi-sensory experiences creating olfactory identity. With each creation, Cecile's passion for fragrance grew, leaving a mark on the world of perfumery. Together with Cecile, we developed the three scents of EAUde1974 which take inspiration from three luxury coastal locations or islands. Immerse yourself in the essence of these scents and discover the fragrance that best complements your personality, style, or moment of the day or night.

Where Scent Comes First

Every EAU creation is powered by high-end fine fragrance, the kind you'd find in luxury perfumes. It's in everything we make, because we believe scent isn't just something you wear, it's something you live in.

From your haircare to your beauty essentials and lifestyle favorites, every product is infused with blends that feel modern, addictive, and unforgettable. One fragrance story, told in every way possible.

SENSORIAL HAIR CARE

EAUde1974

Understanding the composition of Hair Perfume

When it comes to understanding the composition of a hair perfume, it's good to understand it contains of various layers: **the top, heart, and base notes.**

The top notes are the **first impression** of the fragrance and are often perceived immediately upon application. These notes are light and evaporating relatively quickly. They create the first impression. Moving to the heart notes, we encounter the essence of the fragrance. These notes appear once the top notes have evaporated, usually after a few minutes. Heart notes contribute to the main character of the perfume, symbolizing its personality and defining its overall theme. They provide **depth** and **complexity**, lingering on the hair for hours.

Difference between

Hair Perfume & EAU de Parfum

The structure of the hair, with cuticles that can open and close, allows scent molecules to adhere more effectively, ensuring the scent lasts longer. This makes that the fragrance holds longer and spreads steadily.

Less interaction with natural oils

The skin possesses natural oils that can influence the chemistry of a perfume. Hair has less interaction with these oils, and therefore the original scent of the perfume remains longer.

Reduced exposure to external factors

In comparison to the skin, hair is less exposed to external factors such as sweat and friction. This makes that the hair has a consistent smell for a longer period of time.

Hair care that hydrates, protects & shines

EAUde1974 hair perfumes contain nourishing ingredients that hydrate, soften and protect your hair from harmful external influences. Next to that, it gives a beautiful shine to the hair.

EAUde1974

Hair Perfume Collection

The Hair Perfume collection features three captivating scents:

- **EAU de Capri**
- **EAU de Hamptons**
- **EAU de Santorini**

The Hair Perfumes offer a sophisticated olfactory experience. Available in retail-size 50 ml bottles. These 50 ml perfumes are available in three colors: Capri in the orange bottle, Santorini in the blue bottle, and The Hamptons in the green bottle. Additionally, our 50 ml tester items enable you to introduce clients to our fragrances during their salon visit. For clients interested in exploring our offerings further, our 15 ml travel-size bottles provide a convenient sampling option.

How to use:

Spray the Hair Perfume onto your hair, holding 15-20 cm away.

Apply to dry hair for the best fragrance experience.

Reapply throughout the day as desired.

EAUde1974
Hydration
 with Hyaluronic Acid

Hydration is an essential element for healthy hair and skin. It promotes a healthy hair structure and elasticity and softness of your skin. Hyaluronic acid is a substance that naturally occurs in the human body and is used for hydration and moisturizing purposes, contributing to the improvement of skin texture and appearance.

Hyaluronic Acid

in hair care

While hyaluronic acid is widely known in skincare, its application in hair care is a new approach. The integration of this important ingredient into hair care is a sensible next step:

Enhanced hydration

Hyaluronic acid can help retain moisture in the hair, keeping it hydrated, soft, and shiny. **Plumping effect:** Which gives the hair a fuller appearance.

Reduced frizz

By maintaining moisture levels, it helps to reduce frizz and improve hair manageability.

Scalp health

It can also benefit the scalp by providing hydration and reducing dryness or flakiness.

Hyaluronic Plump
 Hydrating Shampoo

Locks in moisture & shine with a skincare-inspired formula that strengthens from root to end.

FAQ

Fragrance & Feel

What are the EAUde1974 scents inspired by?

Each scent is inspired by a destination and a mood. From sunny Capri to breezy Santorini, we aim to bottle up the feeling of being somewhere you love.

What does 'sensorial beauty' mean to you?

For us, sensorial beauty means turning everyday moments into something you actually feel. A soft texture. A calming scent. A little moment of joy. That's what it's all about.

Is the alcohol in the hair perfumes bad for my hair?

The alcohol in our hair perfume helps the formula do its job, which is quick-drying, long-lasting scent, and even application. The alcohol evaporates fast, so it won't dry out your hair, and meets all EU cosmetic standards. Plus, our hair perfumes are enriched with ingredients that hydrate, soften, add shine, and protect your hair throughout the day.

Does the hair perfume actually nourish your hair?

Yes, our hair perfumes have added ingredients like oils or vitamins, so they're not just for smelling good – they help your hair feel good too!

How long does fragrance last on your hair?

Thanks to your hair's natural structure, the scent molecules cling on and provide a steady burst of fragrance throughout the day. Plus, since hair interacts less with natural oils than skin, the original scent stays fresh for longer. You'll enjoy a lovely scent all day!

FAQ

Product & Usage

Are your products suitable for all skin and hair types?

Yes. All our formulas are made to be gentle yet effective—suitable for most skin and hair types, including sensitive ones. If you're unsure, we always recommend doing a quick patch test first.

How should I use the products for the best result?

Each product is designed for easy, intuitive use. You'll find tips and instructions on the packaging and website page when scanning the QR on the products. However, always feel free to turn your routine into your own little ritual.

Can I mix your products with other brands?

Absolutely. Our products are made to complement your lifestyle, not control it. You can mix and match with other favorites without a problem.

Are the products safe for daily use?

Yes, our hair perfumes have added ingredients like oils or vitamins, so they're not just for smelling good – they help your hair feel good too!

How long does fragrance last on your hair?

Yes. All EAUde1974 products are designed for daily use and formulated to support your skin and hair over time, not overload them.

FAQ

Ingredients & Sustainability

Are your products vegan and cruelty-free?

Yes. EAUde1974 does not test on animals, and our formulas are vegan-friendly.

Do your products contain sulfates, parabens or silicones?

No. We keep things clean. Our formulations are free from sulfates, parabens and heavy silicones.

Where are your products made?

All of our hair care and beauty products are developed and produced in Europe, following high quality and safety standards.

Are your packaging materials recyclable?

We aim to use recyclable or recycled packaging wherever possible. Check each item for specific disposal instructions; small steps, big impact.

What is EAUde1974 doing for the planet?

We're continuously working on better packaging choices, responsible sourcing, and formulas that are kind to your body and the environment.
